| <b>Target version:</b>   |        |                    |            |
| <b>Spec Reference:</b>   |        |                    |            |
| <b>Description</b>   |        |                    |            |
| In case of a DL PDU received from GGSN and the MS MM state is STANDBY, the MS must be paged within the RA. |        |                    |            |
| - implement the paging   |        |                    |            |
| - find out what should happen with the DL PDU (there is no queuing in SGSN atm.)                           |        |                    |            |
