

gr-gsm - Feature #3520

apps/grgsm_trx: implement a possibility to shift both RX and TX frequencies

09/04/2018 06:12 PM - fixeria

Status:	Resolved	Start date:	09/05/2018
Priority:	Normal	Due date:	
Assignee:	fixeria	% Done:	100%
Category:			
Target version:			
Description			
This feature would allow OsmocomBB working on SDR PHY to interact with a BTS running in some shifted frequency band (e.g. 2.4 GHz). Please see https://osmocom.org/versions/136 for a bit more detailed description.			

History
