

Cellular Network Infrastructure - Feature #3700

Idea: have a separate GSUP manual

11/19/2018 11:30 PM - neels

Target version:	
Spec Reference:	
Description In our user manuals, we typically describe how to use a program. But the common/chapters/gsup.adoc rather amounts to a protocol definition. A similar type of document is the osmobts-abis.pdf that defines the Abis protocol as implemented by osmo-bts. In the same sense I'd argue that it makes no sense to include the complete GSUP protocol definition in all of the HLR, MSC, SGSN user manuals, and we should have a separate osmo-gsup.pdf instead.
