

OsmoSTP - Bug #4239

osmo-stp allows RKM de-registration of routing key that never was registered via RKM

10/21/2019 12:55 PM - laforge

Status: New	Start date: 10/21/2019
Priority: Low	Due date:
Assignee: laforge	% Done: 0%
Category:	
Target version:	
Spec Reference:	
Description When an ASP is sending an M3UA RKM DEREG for a routing context/key which was statically configured in the VTY/config, we should not allow for de-registration using RKM. RKM should only de-register routing keys/contexts that were dynamically registered first. See upcoming STP_Tests_M3UA.TC_rkm_unreg_never_registered
