

## Osmocom Conferences (OsmoDevCon + OsmoCon) - Bug #1887

### Work out a schedule for public user day of OsmoCon 2017

12/19/2016 09:38 PM - laforge

<b>Status:</b> Closed	<b>Start date:</b> 12/19/2016
<b>Priority:</b> High	<b>Due date:</b>
<b>Assignee:</b> laforge	<b>% Done:</b> 100%
<b>Category:</b>	
<b>Target version:</b> OsmoDevCon 2017	
<b>Description</b>	
The schedule needs to be attractive to users, both newbies as well as more experienced users.	
We need a couple of talks and workshops around running the GSM / GPRS+EDGE / UMTS infrastructure.	
Some random ideas:	
<ul style="list-style-type: none"><li>• running a basic circuit-switched GSM network</li><li>• interfacing a VoIP operator and/or PBXs via SIP</li><li>• running GPRS/EDGE data services with OsmoPCU, OsmoSGSN and OpenGGSN</li><li>• fundamental GSM radio frequency planning</li><li>• setting up + running "3G in a Box" with osmo-juh, OsmoMSC, OsmoSGSN and OpenGGSN</li><li>• GSUP + core network elements for roaming integration</li><li>• using the osmocom control interface</li><li>• efficiently investigate and report issues using wireshark, GSMTAP and libosmocore logging</li></ul>

### History

#### #1 - 12/19/2016 09:38 PM - laforge

- Related to Feature #1885: Format of OsmoDevCon added

#### #2 - 12/19/2016 09:47 PM - laforge

- Precedes Bug #1889: Event website + announcement added

#### #3 - 12/21/2016 06:39 PM - keith

Some more random ideas:

- Osmocom infrastructure, redmine, git, gerrit, jenkins.. (the policy and tradition as much as the tech)
- Hitchhikers guide to the code(s). Where are all the things? (in libosmocore, in openbsc in the libmsc, etc) for example, what if I would like to add a command to the vty?

#### #4 - 01/10/2017 06:28 AM - tnt

A "state of things" would probably be good too. Something listing what works now, fully supported, what's experimental and what's planned for the future so that you know what to expect.

#### #5 - 01/12/2017 01:12 PM - laforge

- Priority changed from Normal to Urgent

**#6 - 01/26/2017 06:40 AM - ipse**

+1 to suggestions from tnt and keith.

Should we also discuss who is presenting what?

**#7 - 02/24/2017 02:34 PM - neels**

- Description updated

**#8 - 02/28/2017 06:01 PM - laforge**

- Subject changed from *Work out a schedule for public user day of OsmoDevcon 2017* to *Work out a schedule for public user day of OsmoCon 2017*

- Status changed from *New* to *In Progress*

- Priority changed from *Urgent* to *High*

- % Done changed from *10* to *50*

**#9 - 03/21/2017 12:24 AM - ipse**

One more suggestion to a list of talks: Using SDR hardware to run a GSM network aka a completely DIY GSM network. Happy to present this one.

**#10 - 03/21/2017 06:54 PM - laforge**

Hi Alexander,

Thanks ofr the offer. However, I think it's not that different from using other hardware with OsmoBTS and OsmoNITB & Co., the only difference is some low-level configuration of OsmoBTS and that you have to run OsmoTRX alongside.

Our focus in the introductory talks about running a cellular network is on OsmoBTS and above, we will not cover details of any particular hardware in those talks.

So if at all, we could do a comparison of different supported hardware, but then we should be fair and try to cover all devices, from BS-11 to Nokia InSite, MetroSite, to Ericsson RBS2000 to symsoBTS models, Nuran, Octasic, USRP, UmTRX, etc.

I'm not sure we have time left in the agenda, but I think that would be informative.
