<b>Target version:</b>			
<b>Spec Reference:</b>			

#### Description

See <http://git.osmocom.org/osmo-trx/tree/Transceiver52M/device/usrp1/USRDevice.cpp#n650>

we discard almost all arguments handed into the constructor without either

1. implementing them, or
2. checking if the user asks for something the hardware doesn't support (and return an error)
