

OsmocomBB - Bug #3669

empty IMSI in vty

10/24/2018 03:50 PM - msuraev

Status:	New	Start date:	10/24/2018
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:			
Target version:			
Resolution:		Spec Reference:	

Description

Sometimes IMSI is not displayed properly by mobile app vty despite being set in config file.

```
telnet 127.0.0.1 4247
```

```
OsmocomBB> sh sub 1
Mobile Subscriber of MS '1':
IMSI:
Status: U2_NOT_UPDATED IMSI detached LAI: invalid
Access barred cells: no
Access classes:
```

History

#1 - 10/24/2018 04:15 PM - fixeria

It's still unclear to me, how to reproduce this "sometimes".
I just tested with a virtual SIM-card, and I can see correct IMSI.

Could you please give more details?
