

Cellular Network Infrastructure - Feature #3699

merge Debian patches

11/19/2018 01:41 PM - msuraev

Status: New	Start date: 11/19/2018
Priority: Normal	Due date:
Assignee:	% Done: 0%
Category:	
Target version:	
Spec Reference:	
Description	
There're numerous patches from Debian developers available via: https://qa.debian.org/developer.php?email=Debian-mobcom-maintainers%40lists.alioth.debian.org individual package links example: https://sources.debian.org/patches/libosmo-sccp/0.10.0-2/ Relevant package version could be obtained from the first link.	
Some of those patches are Debian-specific while others are generally relevant fixes. We should go over all packaged projects and submit all relevant patches to gerrit for review.	
Note: Debian seems to have the most recent versions packaged compared to other repositories according to repology - see for example https://repology.org/metapackage/libosmocore/versions
