Fix sgsn_ranap_iu_event() returning error on SECURITY_MODE_COMPLETE

sgsn_ranap_iu_event() is returning an erroneous value even when the command is processed properly. Fixed to remove unnecessary cn_ranap_handle_co error messages.

Revision 743e6874 - 10/08/2019 12:02 PM - lynxis

gprs_ranap: add missing rc = 0

After processing the event, set the return code to success.
Thanks to manatails (redmine).
