

OsmoPCU - Bug #4204

Gerrit verification does not run in parallel

09/13/2019 11:35 AM - osmith

Status:	Resolved	Start date:	09/13/2019

Description

Gerrit verification takes long, because we are currently not running the builds in parallel.

As mentioned in <https://gerrit.osmocom.org/c/osmo-ci/+/5859> the vty and ctrl tests conflict when running in parallel, but we can probably resolve that conflict when running the build in docker.

History

#1 - 09/18/2019 02:12 PM - osmith

- Status changed from New to In Progress

- % Done changed from 0 to 80

Patch submitted: <https://gerrit.osmocom.org/c/osmo-ci/+/15566>

...but set to WIP, it isn't working on master yet (probably needs another docker argument). I'll fix this tomorrow. It is already working for gerrit verifications, after fixing this: <https://gerrit.osmocom.org/c/osmo-pcu/+/15564>

Failed master job, where I tested this:

https://jenkins.osmocom.org/jenkins/job/master-osmo-pcu/1894/FIRMWARE_VERSION=master.WITH_MANUAL_S=1,label=osmocom-master-debian9.with_dsp=none.with_vty=False/

#2 - 09/19/2019 08:56 AM - osmith

- % Done changed from 80 to 90

Patch fixed, now it works for master too.

#3 - 09/19/2019 01:24 PM - osmith

- Status changed from In Progress to Resolved

- % Done changed from 90 to 100
