

OsmoSGSN - Bug #43

Destroying LLC-LLE after a GPRS Routing Area Update Reject

02/19/2016 10:47 PM - zecke2

Status: Closed	Start date:
Priority: Normal	Due date:
Assignee: lynxis	% Done: 100%
Category:	
Target version:	
Spec Reference:	
Description	
Right now we allocate the LLC-LLE ad-hoc but it will stay allocated even after we have RAU-Rejected the subscriber and he will not be back with the same P-TMSI. We need a way to delete the LLC-LLE in this case.	
Harald's proposal was to use/queue primitives. For the above case we would send a XID, queue the reject and the destroying of the LLC-LLE context.

[lynxis](#) I have the feeling that this may be fixed already. Can you tell me if this is already fixed?

#5 - 09/15/2019 10:17 PM - lynxis

- % Done changed from 0 to 100

Yes, it's fixed.
