### Description

Right now we allocate the LLC-LLE ad-hoc but it will stay allocated even after we have RAU-Rejected the subscriber and he will not be back with the same P-TMSI. We need a way to delete the LLC-LLE in this case.

Harald's proposal was to use/queue primitives. For the above case we would send a XID, queue the reject and the destroying of the LLC-LLE context.

### History

**#1 - 03/17/2016 09:55 AM - laforge**
- Priority changed from High to Normal

**#2 - 05/04/2016 02:28 PM - laforge**
- Project changed from OpenBSC to OsmoSGSN
- Category deleted (234)

**#3 - 01/12/2017 02:27 PM - laforge**
- Assignee set to dexter

**#4 - 09/02/2019 08:10 AM - dexter**
- Status changed from New to Feedback
- Assignee changed from dexter to lynxis

**lynxis** I have the feeling that this may be fixed already. Can you tell me if this is already fixed?

**#5 - 09/15/2019 10:17 PM - lynxis**
- % Done changed from 0 to 100

Yes, it's fixed.

**#6 - 09/15/2019 10:17 PM - lynxis**
- Status changed from Feedback to Closed
